 - Have adequate infrastructure to shelter material from inclement weather in a consolidation storage area;
 - Have sufficient space to receive, sort, store and prepare transportation containers for shipment:
 - As applicable, have material-handling equipment with the ability to move containers onto transport vehicles;
 - Be accessible to transport vehicles for pick- up of Automotive HSP; and
 - Have adequate security measures in place to prevent Automotive HSP from being tampered with by anyone at the site or using the collection facility at unauthorized times.
- 1.3 All waste must be packed in an approved UN container and all HSP transported must be contained in accordance with TDGA requirements.
- 1.4 Bulky items must be stored in an upright position in a secure area, and in accordance with Technical Standards & Safety Authority (TSSA) requirements.
- 1.5 Transportation containers must be filled to capacity, except if this practice contravenes either a ministry order or the Collection Site Operator’s Environmental Compliance Approval Storage Requirements. Waste material collected at event days is an exception since it may not always be possible to fill a transport container of a given waste class to capacity.
- 1.6 Make use of vermiculite in sufficient quantity to cover and protect the waste material from breakage when there is a potential for spillage or breakage of containers in a lab pack during transport:

- 1.7 Place large pails (20 litres or more) on skids and shrink wrap to prevent shifting of waste during transport. Alternatively, gaylord boxes may be used.
- 1.8 Contamination allowances:
- Reasonable efforts must be taken to minimize contamination.
 - The maximum contamination allowance is 5%. This is a weight-based allowance assessed on individual transport containers for a given waste class.
 - Contamination levels in transport containers (mis-packed Automotive HSP, non-program wastes as identified in Appendix A) will be monitored by AMS through random sampling. Collection site operators will be required to take corrective action if contamination allowances are exceeded. AMS reserves the right to revoke the collection site's approval status if corrective action is not taken as requested by AMS.

Appendix A – Waste Packing Standards

Please note: Automotive Materials Stewardship requires that waste materials in each individual row (as numbered in the first column on the left) be packed separately (even though they may be packed under the same waste class)
